In this document, we provide you disposal information for each packaging category and material we use.

At InnoSenT GmbH, we are aware of our corporate responsibility. We established Energy and Environmental management in our company. Sustainability plays an important role in our entrepreneurial activities.

InnoSenT is an ISO 14001 and ISO 50001 certified company.

For more information visit: <https://www.innosent.de/en/company/certifications/>

We highly prioritize environmental protection and adhere strictly to all environmental regulations. Referring to packaging, our primary objective is to prevent or minimize the environmental impact caused by packaging waste.

To achieve this, we actively concentrate on reducing waste, promoting reuse, and implementing recycling practices for packaging materials. In decision making for packaging, we will consider eco-friendly materials will be a suitable option to avoid an unnecessary burden on the environment. We appreciate your efforts to protect the environment and resource-saving action.

The EU member states have put into action the EU Framework Directive 2018/851 and 2018/852 and are now issuing their individual national requirements in compliance.

As per this legal obligation on packaging sorting, please refer to the following sorting instructions for each packaging category in this document.

Thank you for complying with our disposal instructions.
